

# 41<sup>st</sup> NEAIR Conference Program

## November 8 – 11, 2014

**HYATT REGENCY PHILADELPHIA AT PENN'S LANDING  
PHILADELPHIA, PENNSYLVANIA**

### CONFERENCE TEAM

#### President

**BRUCE SZELEST**

#### Administrative Coordinator

**BETH SIMPSON**

#### Local Arrangements Chair

**H. LEON HILL**

#### AV Coordinator

MELISSA THORPE

#### Local Arrangements Coordinators:

MARK PALLADINO

LISA MCCAULEY

LISA PLUMMER

CHAD MAY

BETH FREDERICK

ANITA REECE

#### Program Chair

**ANNEMARIE BARTLETT**

#### Associate Program Chair

MELISSA THORPE

#### Pre-Conf Workshop Coordinator

PAULA MAAS

#### Best Paper Coordinator

JENNIFER MAY

#### Conference Photographer

GARY BODEN

#### Conference Website Coordinator

MARIAN SHERWOOD

#### Evaluation Coordinator

JOEL BLOOM

#### Exhibitor Coordinator

SALLY FRAZEE

#### Guidebook Coordinator

KENNETH SMITH

#### Mentor/Newcomer Coordinators

MAREN HESS

ELIZABETH CLUNE-KNEUER

#### Poster Session Coordinator

CAROL VAN ZILE-TAMSEN

#### Proposal Review Coordinator

ALEXANDER YIN

#### Publications Coordinator

TIFFANY PARKER

**www.neair.org**

The **Third Place** is a comfortable space where NEAIR members can socialize, network, and meet exhibitors in a relaxed atmosphere complete with coffee, food, posters, and internet.

The **third place** is a term used in the concept of community building to refer to social surroundings separate from the two usual social environments of home and the workplace. In his influential book *The Great Good Place*, Ray Oldenburg (1989, 1991) argues that third places are important for civil society, democracy, civic engagement, and establishing feelings of a sense of place. Third places "host the regular, voluntary, informal, and happily anticipated gatherings of individuals beyond the realms of home and work." (Project for Public Spaces)

*In addition to your **Third Place** in the Grand Ballroom and Columbus Ballroom Foyers on the 2nd Floor, this year we have an additional "third place," the Commuter Lounge, Suite 501, located on the 5<sup>th</sup> floor of the hotel. It is a place for daily commuters (and others) to relax and reconnect with colleagues off the beaten path.*

*While at the conference, follow your NEAIR colleagues via Twitter or tweet your insights!*  
**#NEAIR14**

## Guidebook.com – NEAIR's Smartphone Scheduling App

Scheduling, maps, session descriptions, & more...

- Download **Guidebook** (free) on the Apple App Store or Android Marketplace, or visit [guidebook.com/getit](http://guidebook.com/getit)
- Scan in the QR code at left

*The App is available on a limited basis only (to the first 200 members)*

## Pre-Conference Workshop Evaluation

When your Pre-Conference Workshop session concludes, scan in the QR code at left to complete the evaluation with your smartphone.

## Conference Evaluation

Help us improve your conference experience!

Beginning *Tuesday, November 11<sup>th</sup>*, the conference evaluation will be available. Scan in the QR code at left to complete the evaluation with your smartphone!

***NEAIR thanks Gravic for administering the pre-conference workshop and conference evaluations online and by mobile app.***

On behalf of the Conference Planning Team and the NEAIR Steering Committee, I welcome you to the Hyatt at Penn's Landing and the 41<sup>st</sup> Annual NEAIR Conference!

What better setting than Old City Philadelphia, encompassing Independence Hall and the Liberty Bell Center, where we stroll along the same cobblestones as did the founding fathers, to reflect on our conference theme of ***Life, Liberty, and the Pursuit of IR***. The Locke and Jefferson origins of this phrase underscore our moral obligation to serve, to help foster informed judgments on policy and decisions that affect our personal and collective liberties, and to buttress the higher educational enterprise with the information and analyses that both campus leaders and national policy makers need. Our Sunday evening keynote and Monday morning plenary speakers underscore the essence of ***Life, Liberty, and the Pursuit of IR*** as they tackle issues of access and success in today's world of higher education, and how we as a profession contribute to these critical conversations.

Throughout our conference program, with thanks to Program Chair **Annemarie Bartlett** and Associate Program Chair **Melissa Thorpe**, you will be hard pressed to decide which sessions, work shares and tech shares to attend as you pursue improving your IR skills. You can count on high quality presentations, with thanks to **Alexander Yin**, Proposal Review Coordinator, and our numerous volunteer proposal reviewers who conducted blind reviews and provided feedback to presenters. As in past years, a plethora of pre-conference workshops, this time coordinated by **Paula Maas**, are available to inform both the new and the experienced, and our ever growing poster displays, coordinated by **Carol Van Zile-Tamsen**, provide an informal venue to talk shop in a low-key and inviting environment. Throughout your few days in Philadelphia, our Local Arrangements Team, led by **Leon Hill**, has all the bases covered (and the *third place*) to enhance your networking, professional development, and social activities. Our Mentor/ Newcomer Coordinators, **Maren Hess** and **Elizabeth Clune-Kneuer** have done a wonderful job lining up mentors and the newcomer reception to ease our new members into the ever friendly and helpful north east IR community. Please do reach out yourself and welcome those who are new to NEAIR as well.

Please also join me in welcoming our exhibitor sponsors, who have helped make this conference possible, along with our Exhibitor Coordinators, **Sally Frazee** and **Beth Simpson**. As you pursue your little slice of the IR world, be sure to stop by the exhibitor tables or attend a member/exhibitor session to see how others are partnering with our exhibitors to solve their day-to-day challenges.

Most of all, enjoy your life, your liberty, and your pursuit of IR.

Bruce Szelest  
2013-2014 NEAIR President

**NEAIR Presidents List with Conference Locations and Themes from 1981 – 2014**  
**(Please see NEAIR website for complete listing)**

<i>Year</i>	<i>President</i>	<i>Location</i>	<i>Conference Theme</i>
2014	Bruce Szelest	Philadelphia, PA	Life, Liberty and the Pursuit of IR
2013	Catherine Alvord	Newport, RI	Forty Years of Excellence and Beyond
2012	Stephen Thorpe	Bethesda, MD	Time for Decisions Visualizing the Future
2011	Gayle Fink	Boston, MA	Leading the Charge for Institutional Renewal
2010	Heather Kelly	Saratoga Springs, NY	Fountain of Knowledge: IR Collaboration for Effective Change
2009	Mitch Nesler	Baltimore, MD	Harbor in the Storm: Institutional Research in the Age of Accountability
2008	Denise Krallman	Providence, RI	a Culture of Evidence: IR Support, Initiative & Leadership
2007	Martha Gray	New Brunswick, NJ	New Ideas, New Energy, New Brunswick
2006	Marjorie Wiseman	Philadelphia, PA	Soaring to Excellence
2005	Michelle Appel	Saratoga Springs, NY	The Race for Answers: Clarity versus Information Overload
2004	Mary Ann Coughlin	Portsmouth, NH	Guiding Light for the Future: IR Community of Practice
2003	Rebecca Brodigan	Newport, RI	Information Leadership, The Challenge & The Responsibility
2002	James Trainer	Annapolis, MD	Assessment in the 21st Century: Challenges for IR
2001	Anne Marie Delaney	Boston, MA	Institutional Research: Leadership through Excellence
2000	J. Fredericks Volkwein	Pittsburgh, PA	Bridges to the Future: Building Linkages for Institutional Research
1999	Karen Bauer	Newport, RI	Sailing Into the New Millennium: Charting the Course for Institutional Research
1998	Craig Clagett	Philadelphia, PA	The Future Is Now: The Role of Institutional Research in Campus Transformation
1997	Jennifer Brown	Hartford, CT	Accountability and Institutional Research: Measuring Results
1996	Ellen Kanarek	Princeton, NJ	Thoughts of One's Own: Innovative Leadership in Institutional Research
1995	Marian Pagano	Burlington, VT	Comparative and Longitudinal Studies of Higher Education: Harvesting the Findings
1994	Michael McGuire	Baltimore, MD	Informing Higher Education Policy
1993	Dawn Terkla	Lake George, NY	20 Years: Putting it All Together
1992	Larry Metzger	Washington, DC	Defining a Quality Education
1991	Michael Middaugh/ Larry Metzger	Cambridge, MA	Institutional Research In a Changing Society
1990	Michael Middaugh	Albany, NY	Institutional Research: Its Place in the 1990's
1989	Ronald Doernbach	Pittsburgh, PA	Bringing Technology to the Issues
1988	Paige Ireland	Providence, RI	Strategic Choice: Making Better Decisions Through Better Understanding of Institutions and Their Environments
1987	John Dunn, Jr.	Rochester, NY	Assessment: Fad or Fact of Life?
1986	Judith Hackman	Philadelphia, PA	Institutional Research: New Challenges to an Evolving Role
1985	Nancy Neville	Hartford, CT	Institutional Research: Getting to the Core
1984	Paul Wing	Albany, NY	Institutional Research: At the Core of Strategic Planning
1983	Robert Lay	Hershey, PA	Institutional Research and Planning in the next Decade
1982	Helen Wyant	Durham, NH	Doing Institutional Research: A Focus on Professional Development
1981	Patrick Terenzini	Princeton, NJ	

## 2014 Program Schedule – Pre-Conference Activities

**Saturday, November 8, 2014**

### Pre-conference Workshops

#### IPEDS Workshop for Keyholders

The Association for Institutional Research (AIR) and the North East Association for Institutional Research (NEAIR) are co-hosting this one-day IPEDS Workshop for IPEDS Keyholders in conjunction with the 41st NEAIR Annual Conference. Financial support for this workshop is provided by the National Center for Education Statistics (NCES).

8:30 am - 4:30 pm

*Riverview B*

AIR/NCES  
Pre-Conference Workshop

#### Conference Registration - 1st Floor Lobby

Noon - 5:30 pm

#### Your Third Place - Internet Café and Charging Station

Noon – 4:00 pm

*Grand Ballroom & Columbus  
Ballroom Foyers*

#### Newcomers Workshop, Part I

This workshop is designed for new practitioners and addresses key components of IR including: defining critical issues; identifying data sources; developing standard institutional information/reports; and conducting effective assessment/evaluation activities. At the end of the workshop, participants will: understand the basic concepts of IR practice, including: key responsibilities, key constituencies served by IR, and current issues in higher education impacting IR offices; become familiar with common IR phrases, terminology, and definitions; be able to articulate one or more approaches to common IR tasks; have gained insights about the practice of IR both from the presenters and other attendees; have had conversations across sectors about common areas of interest and practice; and possess the resources to explore sector-specific issues and functions.

Pre-Conference Workshop

1:00 pm - 4:00 pm

*Columbus A*

**Terra Schehr**  
Loyola University Maryland

**Jessica Shedd**  
The University of Texas  
System

#### Introduction to Business Intelligence & Analytics in Institutional Research

In spite of the increasing popularity of business intelligence (BI), the term means different things to different people. This workshop will provide an introduction to the basic foundations of business intelligence, decision support, and predictive analytics in IR from a non-technical, end-user perspective. Topics covered include BI tools (Ex: COGNOS, OBIEE, SAS BI), dashboards, scorecards, predictive and visual analytics (Ex: SPSS, SAS Enterprise Miner and Visual Analytics).

Pre-Conference Workshop

1:00 pm - 4:00 pm

*Columbus B*

**Thulasi Kumar**  
University of Connecticut

## Saturday, November 8, 2014

### Pre-conference Workshops

#### Environmental Scanning to Improve Strategic Planning

Workshop outcomes are: 1) differentiate strategic planning from other types of planning; (2) describe and discuss external environmental scanning and its essential role in developing a strategic plan; (3) define trends and provide examples of important trends in eight external environmental (taxonomy) change areas; (4) understand the application of trends to successful strategic plans through case studies presented; (5) experience a simulated small group scanning team exercise; and (6) provide knowledge and skills to successfully organize and operate a scanning and strategic planning activity.

Pre-Conference Workshop

1:00 pm - 4:00 pm  
*Washington A*

**Joel Lapin**  
The Community College of  
Baltimore County

#### Career Management and Leadership in Institutional Research

This workshop is designed to assist those mid-career professionals in IR consider career management and leadership issues in a highly interactive format. Various types of critical skills and experiences will be discussed. Participants will consider a series of issues associated with managing their careers in institutional research including the KSA's needed to move ahead. Topics covered will include sources for ongoing professional development, IR knowledge skills and abilities necessary for success, managing people and budgets, public speaking, and balanced work/family life. The intended outcomes include a more thoughtful and planned approach to career management.

Pre-Conference Workshop

1:00 pm - 4:00 pm  
*Washington B*

**Mitchell Nesler**  
SUNY Empire State College

#### Excel Dashboards from Unit Record Data using Power Pivot

In this workshop you will learn how to create dashboards in Excel using PowerPivot and unit record data. Using example student, applicant and HR datasets, you'll learn how to connect to different data sources, create calculated columns, calculated fields and hierarchies as well as how to create customizable key performance indicators. Using slicers and filters, you'll learn how to create custom and interactive views of your data with graphs and tables. Layout and design, important considerations in any dashboard, will also be covered. Whether you're looking to create operational, tactical or strategic dashboards, you'll learn the skills you need to get started in this workshop.

***Required: Laptop***

Pre-Conference Workshop

1:00 pm - 4:00 pm  
*Riverview A*

**Craig Abbey**  
University of Buffalo

## Saturday, November 8, 2014

### Pre-conference Workshops

#### Course Evaluation Automation with Microsoft Excel

This workshop will demonstrate the use of formulas, cell references, and Visual Basic for Applications (VBA) to automate the creation and distribution of course evaluation summaries with Microsoft Excel. With raw data from Qualtrics and other survey software, participants will create references and formulas to populate question averages and individualized graphs, as well as write VBA to save evaluations as PDFs and distribute them as attachments via Microsoft Outlook to instructors. Limited enrollment will allow ample time for discussion and experimentation. Intended outcomes include: Understanding the use of VBA for automating tasks; troubleshooting broken code and formula errors; and adapting automation to other IR-related projects.

**Required: Laptop**

Pre-Conference Workshop

1:00 pm - 4:00 pm  
*Riverview C*

**Nathan Rush**  
Becker College

**Paul Prewitt-Freilino**  
Wheaton College

#### Welcome Reception

Join the 2014 Philadelphia Conference Team and your colleagues prior to heading out on the town.

5:45 pm - 6:30 pm  
*Riverview – 3rd Floor*

#### Saturday Night Dinner Groups

Sign up in lobby by Conference Registration; Meet in lobby.

6:30 pm

## Sunday, November 9, 2014

### Pre-conference Workshops

#### Conference Registration

8:00 am - 5:00 pm  
*Grand Ballroom Foyer*

#### Newcomers Workshop, Part II

Continuation of Saturday afternoon

Pre-Conference Workshop

9:00 am - Noon  
*Columbus A*

#### Predictive Modeling Using SAS Enterprise Miner

This workshop covers the skills required to assemble analysis flow diagrams using the rich tool set of SAS Enterprise Miner for predictive modeling (decision tree, regression, and neural network models). The workshop will cover the following: define a SAS Enterprise Miner project and explore data graphically; build and understand predictive models such as decision trees and regression models; modify data for better analysis results; compare and explain complex models; and generate and use score code.

Pre-Conference Workshop

9:00 am - Noon  
*Columbus B*

**Thulasi Kumar**  
University of Connecticut

**Tom Bohannon**  
SAS Enterprises

## Sunday, November 9, 2014

### Pre-conference Workshops

#### Assessing General Education Outcomes

This workshop examines general education and how to assess it. Participants will review institutional Gen Ed issues and challenges, learn strategies that assesses Gen Ed at both the course and program levels, identify the Gen Ed Outcomes recommended by the AAC&U, discuss Gen Ed assessment methods, measures, and instruments.

Pre-Conference Workshop

9:00 am - Noon

*Columbus C*

**Fred Volkwein**  
The Pennsylvania State  
University

**Betty Harper**  
The Pennsylvania State  
University

#### IR Support of Program Review Efforts

This session will discuss how IR can support academic, administrative and student life program review efforts. We will discuss the data/information needs of the review process, the different approaches to formalizing the program review process and integrating it into an institution's governance, planning and budgeting processes.

Pre-Conference Workshop

9:00 am - Noon

*Washington B*

**David Hemenway**  
Mitchell College

#### Focus Group Design and Implementation in IR and Assessment

The purpose of this workshop is to provide training on how to conduct effective focus groups in the IR and assessment fields. Workshop participants will reflect on conceptual and methodological issues related to research design, including which IR and assessment questions would be best answered through focus group research, how many focus groups are needed, and how to select and recruit focus groups participants. In addition, workshop participants will practice how to formulate appropriate focus group interview questions and how to moderate an effective focus group in a higher education setting. Workshop participants will apply the conceptual and methodological tools introduced by the instructor in hands-on, small group activities.

Pre-Conference Workshop

9:00 am - Noon

*Riverview A*

**Laura Ariovich**  
Prince George's Community  
College

#### Delaware Study: Best Practices for Data and Visualization, Full Day

The National Study of Instructional Costs and Productivity (Delaware Cost Study) is the "tool of choice" for comparative analysis of faculty teaching loads, direct instructional costs, and separately budgeted scholarly activity, all within academic disciplines. Currently, the Delaware Cost Study is at an all-time high with institutional participation and continues to grow each year. Utilizing data from the Delaware Cost Study, this workshop explores strategies and tactics for (1) integrating data systems, (2) facilitating unit and institutional improvement through benchmarking activities and (3) implementing an integrated approach to planning, which offers several key advantages over traditional systems planning.

Pre-Conference Workshop

9:00 am – Noon

1:00 - 4:00 pm

*Riverview B*

**John Barnshaw**  
University of Delaware

## Sunday, November 9, 2014

### Pre-conference Workshops

#### Predictive Analytics: Building Workflows for IR Offices, Full Day

Few institutional research professionals have extensive experience with predictive analytics or other data mining techniques. This session presents a general framework for conceptualizing a predictive analytic project that participants can apply to their own institutional environments. Utilizing KNIME (open source predictive modeling software), participants will construct their own workflows to extract data, prepare data, and build predictive models within a graphical interface (no code is required). Hands-on applications will focus on key opportunities for institutional research to construct predictive models to support student recruitment and student success using a mock data set.

**Required: Laptop**

Pre-Conference Workshop

9:00 am – Noon

1:00 - 4:00 pm

*Riverview C*

**Paul Prewitt-Freilino**  
Wheaton-Freilino

**Nathan Rush**  
Becker College

#### Your Third Place

Internet Café and Charging Station

Noon - 5:00 pm

*Grand Ballroom & Columbus  
Ballroom Foyers*

#### Dueling Pivot Tables: Compare Survey Data from 2 Populations

Create a tool in MS Excel to graphically present side-by-side quantitative comparison of survey data from two distinct groups of interest. This tool helps to focus on statistically significant differences in the mean response (or proportions) as well as effect size. Other features include "sliders" and "dynamic labels" that provide warnings if sample size is small and the ability for users to select confidence levels. Bring your own survey data or use the sample data set provided.

**Required: Laptop**

Pre-Conference Workshop

1:00 - 4:00 pm

*Columbus B*

**Michael Johnson**  
Dickinson College

#### Survey Research: Best Practices for Institutional Research

This workshop is designed to help newcomers to IR or those who have had minimal exposure to survey research get acquainted with the best practices in survey research methods. Participants will learn how to plan, design, and manage effective print and electronic surveys in a college or university environment. Critical decision points along the lifespan of the survey will be discussed, including how to choose a sample, how to maximize response rates, and what to do with incomplete surveys. The workshop will also demonstrate how to implement techniques using an online survey platform. Upon completion, participants will be able to approach survey projects equipped with strategies to gather meaningful data for their institution using surveys.

**Laptop recommended, but not required.**

Pre-Conference Workshop

1:00 - 4:00 pm

*Columbus C*

**Lauren Conoscenti**  
Tufts University

**Katia Miller**  
Tufts University

**Sunday, November 9, 2014**

**Pre-conference Workshops**

**Qualitative Analysis: What to Do with Comments**

This workshop is intended for IR practitioners who want to improve their skills in collecting, analyzing, and reporting on qualitative data from surveys, interviews, and focus groups. Participants will learn about issues involved in qualitative analysis and will observe and practice some basic techniques. The instructor will lecture on the nature of qualitative data and the goals and challenges of qualitative analysis, will demonstrate basic methods and the resulting analyses and reports, and will direct participants in analytical exercises to practice the techniques and discuss related issues. No special prior skills are needed. Handouts will include the data to be used in the exercises.

Pre-Conference Workshop

1:00 - 4:00 pm  
*Washington A*

**Carol Trosset**  
Bennington College

**#Assessitall: Student Learning & Institutional Effectiveness**

The commitment to continuous improvement requires campuses to assess it all! But assessment of student learning is often seen as separate from assessment of institutional effectiveness. In this workshop participants will discuss benefits and strategies for connecting assessment of student learning with assessment of institutional effectiveness. There will be examples and hands-on activities throughout the workshop with a particular focus on using assessment results for continuous improvement, planning and decision making. Throughout the session participants will discuss the role institutional research can play in integrating or coordinating campus-wide assessment efforts.

Pre-Conference Workshop

1:00 - 4:00 pm  
*Washington B*

**Jodi Levine Laufgraben**  
Temple University

**Introduction to Statistics using SPSS**

This workshop will develop participants' basic understanding of statistics and of SPSS. Participants will learn the conceptual underpinnings of many common descriptive and multivariate analyses and will also learn to conduct these analyses in SPSS and interpret the results. Participants will learn how to produce and apply measures of central tendency, variance, and outliers; confidence intervals, frequency distributions and cross tabulations; tests of group differences (i.e., t-tests, ANOVA); correlation; and regression. Emphasis will be placed on how to interpret output and communicate results, as well as on statistical versus substantive significance. Participants will perform statistical operations with SPSS using student survey data.

**Required: Laptop**

Pre-Conference Workshop

1:00 - 4:00 pm  
*Riverview A*

**Jessica Sharkness**  
Tufts University

**Sunday, November 9, 2014**

# NEAIR 2014 Conference Program

## **Welcome to Philly! Coffee Break**

Sponsored by ExamSoft, Diamond Sponsor

Enjoy a cup of coffee or tea while perusing and chatting with our eighteen exhibitor sponsors in the Exhibitor Showcase Hall/Third Place. Take advantage of our Internet café and charging station, view the many posters presentations, our network with your colleagues.

4:15 - 5:00 pm

*Grand Ballroom & Columbus  
Ballroom Foyers*

## **Mentor Program and Newcomers Reception**

New to NEAIR? New to IR? Or, looking for your mentor? The Membership Committee has arranged this reception just for you. Come and get connected with NEAIR colleagues and members of the NEAIR Leadership Team.

4:15 - 5:00 pm

*Columbus A*

## **Opening Plenary Address**

### ***Access and Success in Higher Education: Can We Do More?***

Education Trust President Kati Haycock will share national data on access and success in higher education, especially for low-income students and students of color. She will share what the Trust has learned from leading institutions, and discuss ways in which institutional researchers can help in improvement efforts.

Diamond and Platinum Sponsor Lightening Talks immediately following.

5:00 - 6:15 pm

*Grand Ballroom*

**Ms. Kati Haycock, President**  
The Education Trust

## **Pursuit of IR Reception and Banquet**

Reception begins at 6:15pm in the Columbus Ballroom followed by our Sunday Opening Dinner Buffet at 7pm in the Grand Ballroom.

6:15 - 7:00 pm

*Grand Ballroom & Columbus  
Ballroom and Foyers*

## Monday, November 10, 2014

<b>Continental Breakfast</b>  NEAIR Conference Team Leaders encourage SIG and Table Topic attendees to eat breakfast first before attending session of choice.	7:30 am - 8:45 am <i>Columbus Ballroom</i>
<b>Conference Registration and Your Third Place</b>  Exhibitor Showcase, Posters, Internet Café and Charging Station	8:00 am - 5:00 pm <i>Grand Ballroom &amp; Columbus Ballroom Foyers</i>
<b>Special Interest Groups and Table Topics</b>	
<b>IR Offices in Special Focus Institutions</b>  A SIG for IR practitioners from special focus institutions such as schools of art/design/music, law, health/medicine, engineering, etc. Come together for an opportunity to discuss shared experiences and challenges related to specialized accreditation, assessment, reporting/analysis, and IR in small institutions. Get to know your colleagues in the NEAIR region working at institutions like yours.  <div style="text-align: right;">Special Interest Group</div>	8:00 am - 8:45am <i>Riverview A</i>  <b>Christopher Vinger</b> New York School of Interior Design
<b>Higher Education Consortia/Delaware Cost Study</b>  The Delaware Cost Study is an international benchmarking project that seeks to address, "Who is teaching what to whom, and at what cost?" Each year, more than 200 institutions participate and utilize these data for benchmarking, academic program reviews, accreditation, addressing faculty disparity, faculty hiring, deciding which programs to expand or contract, research and public service expenditure, and general unit and institutional improvement. This Special Interest Group provides the unique opportunity to learn more about the Delaware Cost Study and new initiatives to engage with participants and administrative staff.  <div style="text-align: right;">Special Interest Group</div>	8:00 am - 8:45am <i>Riverview B</i>  <b>John Barnshaw</b> University of Delaware  <b>Tom Eleuterio</b> University of Delaware
<b>COFHE Update</b>  For COFHE members and guests only. Research update and an opportunity to discuss current and future research projects coordinated through the Consortium.  <div style="text-align: right;">Special Interest Group</div>	8:00 am - 8:45am <i>Riverview C</i>  <b>Stephen Minicucci</b> Consortium on Financing Higher Education

## Monday, November 10, 2014

### Special Interest Groups and Table Topics

#### Maryland Association for Institutional Research

Join your Maryland institutional research and assessment colleagues to discuss state and regional issues. Come prepared to suggest topics of interest for upcoming association events.

Special Interest Group

8:00 am - 8:45am  
*Washington A*

**Gregory C. Spengler**  
University of Maryland,  
Baltimore

**Doug Nutter**  
Bowie State University

#### Greater Philadelphia Association of Institutional Research (GPHLAIR)

Join IR colleagues from the Greater Philadelphia as we discuss topics of interest to those in the Philadelphia area. Our SIG provides opportunities to meet new faces and catch up with old ones.

Special Interest Group

8:00 am - 8:45am  
*Washington B*

**Mark Palladino**  
Philadelphia University

**Stephen Thorpe**  
Widener University

**Chad May**  
Holy Family University

### Concurrent Sessions

#### Look at Yourself From Your Student's Point of View - a Life-Cycle Approach to Analysis and Evaluation

Are you still looking at trends from an institutional researcher's point of view? In these days of falling enrollment, that can be a critical mistake. Learn how a student-centric lifecycle view can expose hidden problems that—individually—might go unnoticed, but combined could be catalysts behind student decisions to leave.

NEAIR Member & Sponsor Presentation

8:00 am - 8:45am  
*USS New Jersey*

**Bob Scott**  
Bilander

#### Assessing Faculty Productivity and Research Performance

Your institution must demonstrate return on investment in all areas, including sponsored research. This workshop will use InCites™ to present and highlight the importance of research assessment and will cover various bibliometric indicators used to measure research performance, including article output, citation count, h-index, citation impact, and normalized relative indicators.

NEAIR Member & Sponsor Presentation

8:00 am - 8:45am  
*USS Olympia*

**Jeffrey Clovis**  
Thomson Reuters

## Monday, November 10, 2014

### Plenary Session

#### Conversation with the Presidents

College Presidents' Panel on Student Access and Success, and the Institutional Research Perspective

9:00 am - 10:15 am  
*Grand Ballroom*

**Rev. Peter M. Donohue,  
OSA, PhD**  
Villanova University

**Dr. Richard Englert,  
Chancellor**  
Temple University

**Dr. Karen A. Stout**  
Montgomery County  
Community College

#### Grab and Go Coffee Break

10:15 - 10:30 am  
*Grand Ballroom & Columbus  
Ballroom Foyers*

### Concurrent Sessions

#### NCES Updates Part I

This session will focus on the National Center for Education Statistics' changes and updates to the IPEDS Data Collection 2014-15 and 2015-16 as well as the Sample Surveys including NPSAS, which are standardizing the collections to reduce burden. Time for questions will be provided at the end of the session.

Workshare

10:30 am - 11:15 am  
*Columbus A*

**Sean Simone  
Gigi Jones**  
National Center for  
Education Statistics, U.S.  
Department of Education

#### Constructing a Longitudinal Survey for Student Success

Utilizing a validated survey to better understand the characteristics of new students has become vital to many colleges. However, many commonly used instruments are designed only for new students and have not been recommended for continued use on returning students. This session provides an overview of the construction and validation of a Student Self-Assessment Survey (SSAS) to identify both new and returning students who might be at risk and evaluate each student longitudinally. The SSAS measures academic, social, and psychological fitness before and after the transition to college. Results of a factor analysis and an automated process in MS Excel that emails individualized student reports to advisers as PDFs will be shared.

Workshare

10:30 am - 11:15 am  
*Columbus B*

**Paul Prewitt-Freilino**  
Wheaton College

**Nathan Rush**  
Becker College

## Monday, November 10, 2014

### Concurrent Sessions

<p><b>The Accreditation Survival Guide</b></p> <p>Attendees will learn strategies that were used by Institutional Research, Planning, &amp; Assessment in order to meet the data requirements for NEASC Accreditation. Processes and tools will be presented for institutions to utilize during their own accreditation process. They will learn about the self-study process and successful practices to ensure the self-study is evidence-based. Attendees will receive guidance and discuss ideas to assist in evaluating accreditation standards. Data collection and outcomes assessment strategies will be discussed in the context of accreditation.</p> <p style="text-align: right;">Workshare</p>	<p style="text-align: right;">10:30 am - 11:15 am <i>Columbus C</i></p> <p style="text-align: center;"><b>Angelina O'Brien</b> Bristol Community College</p>
<p><b>NEAIR Membership Committee - Open Discussion for Mid-Career Professionals</b></p> <p>This session is an open discussion facilitated by the NEAIR Membership Committee. It is intended for mid-career professionals to ruminate on their experiences and identify areas where NEAIR can improve support, communication and career planning for those with entry to mid-level experience in Institutional Research. All members, regardless of experience, are encouraged to attend and share their thoughts. The results of this discussion will be compiled into a written report to be submitted to the NEAIR Steering Committee.</p> <p style="text-align: right;">Open Discussion</p>	<p style="text-align: right;">10:30 am - 11:15 am <i>Suite 501 - 5<sup>th</sup> Floor</i></p> <p style="text-align: center;"><b>Alison Weingarten</b> Guttman Community College</p> <p style="text-align: center;"><b>Elizabeth Clune-Kneuer</b> St. Mary's College of Maryland</p> <p style="text-align: center;"><b>Melanie Larson</b> Lasell College</p> <p style="text-align: center;"><b>Maren Hess</b> Campbell University</p>
<p><b>A Course-Based Plan to Review Struggling Academic Programs</b></p> <p>Academic programs with declining enrollment and poor financial profiles are often difficult to terminate due to the complexity of the issue; these decisions are often difficult to make, especially lacking sound quantitative data to support such a decision, and compiling those data is an often lengthy and challenging process. Attendees should leave this workshare presentation with a deeper understanding of one approach to the delicate task of ending academic programs. We hope the detailed steps provided will offer the audience a guide to the workload, costs, and revenue aspects of this process, and that they may be able to apply to their own unique situations.</p> <p style="text-align: right;">Workshare</p>	<p style="text-align: right;">10:30 am - 11:15 am <i>Riverview A</i></p> <p style="text-align: center;"><b>Matt North</b> Duquesne University</p> <p style="text-align: center;"><b>Angela Chirumbolo</b> Duquesne University</p>

## Monday, November 10, 2014

### Concurrent Sessions

<p><b>Projecting Course Enrollments: A Work In Progress</b></p> <p>The University of Maine Office of Institutional Research recently developed a method to provide course-level projections for informing the scheduling process at UMaine each semester. We will focus the first part of this Workshare on describing our methodology and outlining the implementation process. In the more technical portion, we also will share some SPSS syntax that may be useful to other institutional researchers who similarly face this task. In the second part, we will disclose the lessons we have learned so far from our experience with this process and, further, welcome the thoughts, insights, and suggestions from our NEAIR colleagues.</p> <p style="text-align: right;">Workshare</p>	<p style="text-align: right;">10:30 am - 11:15 am <i>Riverview B</i></p> <p style="text-align: center;"><b>Debra Allen</b> University of Maine</p> <p style="text-align: center;"><b>Ted Coladarci</b> University of Maine</p>
<p><b>Predictive Modeling: Benefits of a Beginning Student Survey</b></p> <p>Predicting student retention is particularly challenging for nontraditional institutions and particularly those with open enrollment. This paper will briefly cover how and why the Beginning Student Survey (BSS) was developed and will discuss how the predictive models of student retention used at Excelsior College were improved by including items from the BSS. This talk is appropriate for anyone interested in predictive modeling, beginning student surveys, or issues faced by nontraditional institutions.</p> <p style="text-align: right;">Contributed Paper</p>	<p style="text-align: right;">10:30 am - 11:15 am <i>Riverview C</i></p> <p style="text-align: center;"><b>Kim Speerschneider</b> Excelsior College</p>
<p><b>Wage Data: Post-Graduate Outcomes and More</b></p> <p>The use of state Unemployment Insurance (UI) wage data to better understand student outcomes post-graduation has become increasingly common. However, the UI data can be informative far beyond this narrow purpose. One state university system's experience using the UI data for post-graduate outcomes will be discussed as well as two additional analyses being conducted in partnership with two system institutions: 1) using UI data to better understand the employment patterns of students while enrolled at one specific institution, and 2) comparing alumni self-reported income data to the UI wage data to determine the validity of one institution's long-standing alumni survey.</p> <p style="text-align: right;">Workshare</p>	<p style="text-align: right;">10:30 am - 11:15 am <i>Washington A</i></p> <p style="text-align: center;"><b>Jessica Shedd</b> The University of Texas System</p>
<p><b>Defining Promise: Optional Testing in Admissions</b></p> <p>About 850 institutions have made standardized testing optional for admissions. This session will discuss a three-year national study of 123,000 students at 33 public and private institutions. It is the first published research that evaluates optional testing policies across institutional types. Our fundamental question: Are college admissions decisions reliable for students who are admitted without SAT or ACT scores? Does standardized testing produce valuable predictive results, or does it artificially truncate the pools of applicants who would succeed if they could be encouraged to apply? Based on this study, at least, it is far more the latter.</p> <p style="text-align: right;">Contributed Paper</p>	<p style="text-align: right;">10:30 am - 11:15 am <i>Washington B</i></p> <p style="text-align: center;"><b>William Hiss</b> Bates College</p> <p style="text-align: center;"><b>Valerie Franks</b> Valerie Franks Consulting</p>

## Monday, November 10, 2014

### Concurrent Sessions

#### **Leveraging Assessment Technology for Continuous Improvement and Student Success**

In this presentation, participants will hear case studies about ExamSoft users regarding their experience with the suite and how it has helped impact student learning outcomes, assisted in curriculum mapping and course development, and more. Participants will also be shown ExamSoft's end-to-end assessment suite, which includes cloud-based item banking and tagging tools; exam blueprinting and creation; secure delivery methods; rubrics creation and delivery; automatic scoring; and robust reporting features including longitudinal reporting, among others.

NEAIR Member & Sponsor Presentation

10:30 am - 11:15 am  
*USS New Jersey*

**Emma Schartner**  
ExamSoft Worldwide, Inc.

#### **Does a Flexible Pace Course Format Work Better than Traditional?**

Title III grant funding allowed MCC to implement a flexible pace course format pilot for two developmental math courses. Our IR office was tasked to see if it made a difference in grade and retention outcomes. Could this work at your college too?

Workshare

10:30 am - 11:15 am  
*USS Olympia*

**Andrew Welsh**  
Monroe Community College

#### **Annual Business Meeting Luncheon**

11:30 am - 1:00 pm  
*Grand Ballroom*

#### **NCES Update and Tools Part II**

This session will discuss the remaining changes to IPEDS and NPSAS from the morning session. Time left over will be reserved to present IPEDS tools. Time for questions will be provided at the end of the session.

Workshare

1:15 pm - 2:00 pm  
*Columbus A*

**Sean Simone**  
**Gigi Jones**  
National Center for  
Education Statistics, U.S.  
Department of Education

#### **Strategies for Collecting Post-Graduation Outcomes Data**

Post-graduate outcomes data are being highlighted by external agencies as key metrics to be shared with students and families. Job placement rates and/or graduate school enrollment are important institutional measures of effectiveness, as well as marketing and recruitment tools. Most institutions rely on alumni surveys to collect this data; however, an underlying challenge is obtaining an adequate amount of responses in order to report useful outcomes data. This workshare will highlight the strategies of institutional research offices at a small private college, a mid-size private college, and a medium-sized public research university in obtaining increased response rates for post-graduation outcomes data.

Workshare

## Monday, November 10, 2014

### Concurrent Sessions

#### Tools and Tactics for Combating Survey Fatigue

With the increasing demand for accountability, institutional research offices often juggle many requests to administer student surveys for assessment purposes. This session will detail how the Office of Institutional Research and Assessment at one large, research institution works to prevent student survey fatigue to maintain high response rates through a centralized survey administration process. This centrally coordinated process includes efforts such as the development of a survey calendar, a university survey committee, marketing and communication, and distribution of survey data and information. These techniques will be discussed and participants will have the opportunity to brainstorm ideas for implementation at their institution.

Workshare

1:15 pm - 2:00 pm  
*Columbus C*

**MacKenzie Lovell**  
Temple University

**Gina Calzaferri**  
Temple University

#### Do I Get a Do-Over? Assessing Course Repeat Policy

Recently, the University at Buffalo began to review its policies on course resignations in the hopes of reducing undergraduate time to degree. A key component of this review is the assessment of a recent policy initiative that limited repeats for popular introductory and general education courses. We expect that patterns of enrollment and student success following the prior policy change will help to support or refute the anticipated benefits of disincentivizing course resignation. This presentation will review bivariate and multivariate analyses that highlight the impact of course resignation under old and new course repeat policies.

Workshare

1:15 pm - 2:00 pm  
*Riverview A*

**Lauren Young**  
University at Buffalo

#### To Be or Not to Be a Full-Time Student: That's the Question

Course completion rates at Empire State College are significantly lower for full-time students when compared to part-time students. This research will integrate multiple data sources and focus on answering two main questions within the realm of adult/nontraditional education: 1) Are certain populations or groups of students better equipped to handle the workload associated with being a full-time student? And 2) What is the impact on course completion rates when a student transitions from part- to full-time, or vice versa, across terms? This presentation will help the audience gain knowledge about the adult/nontraditional student population, and learn about integrating data from multiple sources.

Contributed Paper

1:15 pm - 2:00 pm

**Katherine Ostroot**  
SUNY Empire State College

**Joseph King**  
SUNY Empire State College

## Monday, November 10, 2014

### Concurrent Sessions

#### Graduate Time to Degree Data for Reporting and Practical Use

The time it takes to complete a doctoral program varies on many levels. Defining the metrics that capture these data can be equally challenging and nuanced. Practical approaches and solutions for designating cohorts, managing program changes, and explaining policy and contextual nuances intertwine to underscore the resulting time to degree (TTD) metrics. A large public research institution's IR office and its graduate school have collaborated to manage how we report, utilize, and inform different audiences with these data. This workshare presentation will shed light on the practices that have been developed for these purposes and ignite discussion on best practices and recommendations for thinking about calculating and using TTD data.

Workshare

1:15 pm - 2:00 pm  
*Riverview C*

**Wayne Taliaferro**  
University of Maryland

**Shama Akhtar**  
University of Maryland

#### Investment in Space Design: Culture of Student Satisfaction

Thoughtful investment in student feedback, diverse organizations and unique contexts can yield creative patterns for space design and execution, with lasting impact. With student satisfaction and success linked, campus space design should align with students' satisfaction, best practices, and resource allocations. SUNY Binghamton's integration of student feedback and resources in a decade of significant physical changes has enhanced impacts on student satisfaction as well as social, and economic outcomes. This session will highlight Binghamton's culture of space planning in relation to student feedback in unified movement that progressively emanates from students' spatial experiences in order to enhance student satisfaction/success.

Workshare

1:15 pm - 2:00 pm  
*Washington A*

**Nasrin Fatima**  
Binghamton University

**Couper Gardiner**  
m.Arch, Inc.

#### The 20/20 on 2015: A Strategic Planning Vision for the Future

In 2013 our University purchased Compliance Assist-Planning, a module with the Campus Labs suite of products. Planning is a module that facilitates the collection and storage of data for the purposes of monitoring the goals and objectives set forth in strategic plans at the University, school, and program levels, as well as for integrating assessment activities at the University. The purpose of this techshare is to demonstrate how this system facilitates and streamlines assessment efforts, as well as exhibit how our University is using the Planning platform. We would like to share our experience with those contemplating purchasing such a system or are investigating the various systems available.

Techshare

1:15 pm - 2:00 pm  
*Washington B*

**Debbie Shatzkes**  
Adelphi Univeristy

## Monday, November 10, 2014

### Concurrent Sessions

#### Peer Benchmarking Using U.S. News Academic Insights, Temple University Case Study

U.S. News Academic Insights is the top peer benchmarking and performance assessment tool in Higher Education. Containing unpublished rankings and data, Academic Insights allows administrators the ability to create custom peer groups and compare their relative performance to others. Data can be visualized using Academic Insights unique visualizations or exported as reports or in raw form. This session will demonstrate the features of Academic Insights and how Temple University is utilizing the platform to improve their internal reporting capabilities.

NEAIR Member & Sponsor Presentation

1:15 pm - 2:00 pm  
*USS New Jersey*

**Evan Jones**  
U.S. News Academic Insights

**Dana Kerr**  
Temple University

#### Networking and Collaboration: Social Media Tools for IR

Have you ever wanted to connect with others beyond email and conferences? Heard about social media but not sure where to begin? This session will provide an introduction to different interconnected social media networks such as: NEAIR Forum, LinkedIn, Twitter, Facebook and blogging. Both technical and social (etiquette) applications will be introduced. Participants will learn what resources are available to connect beyond conferences to bring further collaboration and support. Additionally, attendees will learn potential uses for each platform as well as how it can contribute to a personal learning network both within IR and Higher Education.

Workshare

1:15 pm - 2:00 pm  
*USS Olympia*

**Elizabeth Clune-Kneuer**  
St. Mary's College of  
Maryland

**Claire Goverts**  
SUNY Brockport

#### Data & Dessert Poster Session - Formal Poster Viewing

Presenters will be available from 2:15pm -3:00 pm

2:15 pm - 3:00 pm  
*Grand Ballroom & Columbus  
Ballroom Foyers*

### Poster Sessions

#### A Case Study in Collaboration Between IR Offices (1)

The ProArts Consortium consists of six Visual and Performing Arts institutions in Boston. Cross-registration for select courses is available to students who attend one of these schools. IR professionals from these schools collaboratively designed a survey to measure students' awareness, perceptions, and use of the cross-registration opportunity and to aid in a new strategic planning process. This poster presents survey results and a description of the collaboration process among the six IR offices.

Poster

2:15 pm - 3:00 pm

Massachusetts College of Art  
and Design

## Monday, November 10, 2014

### Poster Sessions

#### **Application of Random Forests to Predict Retention (2)**

Random Forests (RF; machine-learning algorithms) are an important tool for identifying variables of most impact to relevant outcomes. RF are extensively used in disciplines such as genomics and engineering, and this poster presents a viable use of RF for tackling age-old problems like retention and graduation. This poster will familiarize the community with the novel methodology, its output, as well as data concerns that have to be bridged before successfully applying the method.

Poster

2:15 pm - 3:00 pm  
*Grand Ballroom & Columbus  
Ballroom Foyers*

**Vaishali Jahagirdar**  
Excelsior College

#### **Charge! Rallying Behind A Campus Student Success Initiative (3)**

As one component of the Undergraduate Student Success Initiative, a first- to second-year retention study explored factors related to attrition, such as first generation status, geographic location, tutoring visits, Pell grant awards, EFC bands, student support programs, and attendance confirmation dates. Findings were used to inform the campus community of significant differences in retention and first year GPA among student groups. This poster presents these findings and describes Institutional Research's role in collecting data across several disparate systems.

Poster

2:15 pm - 3:00 pm  
*Grand Ballroom & Columbus  
Ballroom Foyers*

**Jason Schweitzer**  
Rutgers University, Camden

**Sarah Donnelly**  
Rutgers University Camden

#### **Early Alert Assessment at an Urban Community College (4)**

In collaboration with Academic Affairs, Student Affairs, and IT, Queensborough Community College implemented a campus-wide Early Alert Student Support Network to address student academic needs early in the semester. The Office of Institutional Research and Assessment developed formative and summative assessment tools to evaluate the usage and effectiveness of the Early Alert Student Support Network. This poster shares the development, implementation, and results and addresses difficulties and challenges of research design, student tracking, and interpretation of the results.

Poster

2:15 pm - 3:00 pm  
*Grand Ballroom & Columbus  
Ballroom Foyers*

**Elizabeth Lackner**  
Queensborough Community  
College

#### **Factbook Makeover: Revising our Outdated Facts & Figures (5)**

For many IR offices, an annual factbook is the most widely shared and referenced report among internal and external constituents. This visual display will present one IR office's process to update its university factbook and improve its utility to the campus community. Examples of data tables both before and after revision are displayed, with a link to the final documents. Presenters will address the challenges of meeting multiple users' needs and of using the Cognos reporting tool.

Poster

2:15 pm - 3:00 pm  
*Grand Ballroom & Columbus  
Ballroom Foyers*

**Allison Walters**  
University of Delaware

**Di Chen**  
University of Delaware

## Monday, November 10, 2014

### Poster Sessions

#### Faculty Retention and Departure at the University of Texas System (6)

Extreme faculty turnover is problematic for an institution as faculty departure is associated with costs related to hiring, short-term replacement costs, and disruptions of course offerings and mentoring students, etc. This study examined retention and attrition rates of tenured and tenure-track faculty at the University of Texas System between Fall 2007 and 2012. Particular emphasis was placed on tracking cohorts of newly hired faculty as well as newly tenured faculty for five years after initial hire or achieving tenured status.

Poster

2:15 pm - 3:00 pm  
*Grand Ballroom & Columbus  
Ballroom Foyers*

**Jessica Shedd**  
The University of Texas  
System

#### Perceived Bias Against Asian American Applicants (7)

This study examines bias against Asian American applicants at elite institutions. A series of logistic regressions was used to estimate the effect of being Asian American on the probability of acceptance into the university. The results of the study highlight the issue of omitted variable bias in regression analysis and also identify the lack of demonstrated interest as a possible hindrance to Asian American applicants in college admissions.

Poster

2:15 pm - 3:00 pm  
*Grand Ballroom & Columbus  
Ballroom Foyers*

**Margaret Munley**

#### The Student Achievement Measure (SAM): A More Comprehensive Measure of Student Attainment (10)

The Student Achievement Measure (SAM) is a collaborative effort by six higher education associations to enhance transparency and to present a more comprehensive measure of student attainment. SAM tracks student movement across institutions to provide a more inclusive picture of undergraduate student progress and completion and is a voluntary alternative to the federal graduation rate. Through a shared website, institutions across sectors can deliver a more complete picture of student progress and attainment.

### Poster Sessions

#### Time Series Modeling of Immediate Transition to College (11)

The percentage of high-school graduates immediately transitioning to college for the period 1973-2012 is analyzed, using figures from the NCES. This study compares time series models for 2-year and 4-year institutions, in order to shed light on the dynamics impacting new student enrollment forecasting and its implications for institutional planning. The results indicate that the transition to 2-year and 4-year institutions do not fit equivalent time series models.

Poster

#### Who Are We Counting? Who Are We Missing? A Further Analysis (14)

At Massasoit Community College, complete success data existed only for the two fifths of students comprising the IPEDS GRS cohort—until recently. This poster summarizes the college's findings on student success when using an expanded definition and disaggregating success metrics to focus on student populations underrepresented in the traditional cohort. This approach provides a more thorough understanding of student success than aggregate rates alone. Sharing these new data with the campus community has impacted programming, planning, and decision-making.

### Poster Sessions

#### **Womens Graduate STEM Degree Attainment by Land-Grant Status (15)**

In recent years STEM fields have been promoted as an area of national need. Women have traditionally been underrepresented in STEM fields. Since graduate enrollment increases during recessions and Land-grant institutions have access and equity at their roots, reviewing women's graduate STEM degree attainment in the US by land-grant status is a means to consider an institutional level of review in the context of a recession.

grant Universities (APLU)

#### **2013 Best Paper: Understanding the Leaky STEM Pipeline by Taking a Close Look at Factors Influencing Retention and Graduation Rates (16)**

Despite the fact that STEM has become one of the progressively hot topics for higher education in recent years, there are not many studies comparing the retention and graduation performance of the overall entering cohort with the performance of entering students majoring in a STEM discipline. In this study, data from the main CSRDE survey and the CSRDE STEM survey are used to compare the overall, the institution-wide, and the STEM discipline-specific Year1 to Year2 retention rates and four-year graduation rates. The results of this study visually underscore the leak in the STEM education pipeline for higher education.

#### **2013 Best Poster: Examining the First Term Experiences of New Freshmen: An IR Approach (17)**

Our research sought to investigate the first semester experiences of first-time, full-time freshmen at our institution. At present, publicly available data on freshmen are often limited to admissions and enrollment. Recognizing the importance of freshmen's first-term experiences to our university's strategic goals and student success, we sought to provide additional data to campus constituents to describe how freshmen navigate their first semester. The outcome was a comprehensive report describing freshmen's pre-enrollment characteristics, majors, course-taking behavior, academic outcomes, and perceptions of their first-semester experience. The report was widely distributed and well received. We hope our poster viewers will be able to: 1) create a narrative about the experiences of new freshmen using IR data, 2) conceptualize the integration of survey assessment data with complementary data in an IR report, 3) consider critical topics on their campus that can be explored from both an IR and assessment lens, and 4) map the process of designing an analysis that utilizes both IR and assessment data.

### Concurrent Sessions

#### **Mixed Feelings/Methods: IR Bias and Qualitative Methods**

Institutional researchers mainly rely on quantitative methods for their work. Is the cause due to the nature of institutional research or some bias? This study explored this question, with a focus on IR perceptions toward qualitative methods. Using mixed methods, AIR assisted with a survey of 573 AIR members followed by 14 telephone interviews to help explain the results. Findings suggested that institutional researchers generally have a positive perception of qualitative methods and that bias does not explain the variation in qualitative use for IR functions. This paper presentation outlines the factors that appear to influence the perceptions and use of qualitative methods, such as educational background and institutional culture.

#### **Building a Predictive Model of Student Retention**

This workshare will describe the on-going efforts at Fordham to create a predictive model for first to second year students. Drawing a variety of institutional data, including student demographics, financial aid indicators, and course registrations, I create and test different models to identify students at-risk of leaving the university.

Workshare

3:15 pm - 4:00 pm

*Columbus B*

**Kimberly Johnson**  
Fordham University

#### **Using the Dickeson Model for Academic Program Reviews**

A working group of Loyola University members, recently converged to assess the financial viability of current graduate programs. An evaluation process was developed based on the ten criteria that Robert Dickeson recommends in his book, *Prioritizing Academic Programs and Services*. By using the Dickeson criteria, our group was able to produce comprehensive graduate program reviews rooted in qualitative and quantitative data. The Dickeson model provided a standard to which the graduate programs could be reviewed and measured, following a prioritization process method. Individual perspective on the advantages and limitations encountered throughout this process can be beneficial to other institutions preparing to use similar models.

Workshare

3:15 pm - 4:00 pm

*Columbus C*

**Nicole Simone**  
Loyola University Maryland

#### **Electronic Course Evaluations: Evaluate, Analyze, Share!**

With the ongoing need to increase efficiency and the expectation to distribute data and information to constituents faster, institutions continue to transition from paper based course and teaching evaluations to an online format. This session will detail how one large research institution navigated the transition within a diverse academic environment. Learnings from the process will be shared, with a focus on marketing and communication strategies to maintain high response rates and the development of a system for sharing evaluation results with students. Participants will have the opportunity to share their own experiences and brainstorm ideas for adapting these systems for use at their own institutions.

Workshare

3:15 pm - 4:00 pm

Cornell University

#### Advanced Modeling Techniques for Benchmarking Data

Utilizing data from the Delaware Cost Study, this session explores the differences between internal and external benchmarking, how to present these data simultaneously, and advanced modeling techniques. Some of these advanced modeling techniques include cluster analysis, an ideal technique for exploring similarities and differences between peers, ordinary least squares (OLS) regression utilizing benchmarked data, and Monte Carlo methods. Monte Carlo methods are a unique statistical technique that allow for the simulation of a dependent variable. Monte Carlo simulations allow for modeling benchmarked data in a variety of institutional research capacities including enrollment management, retention, cost analyses and planning.

#### Creating a Framework for Post-collegiate Outcomes

The Post-Collegiate Outcomes (PCO) initiative designed to include broad perspectives on post-collegiate outcomes, and explore the rationale for different measures for different audiences. Charged with developing a framework and proposed policy agenda, the initiative has been working to create answers for institutions, by institutions including: Who will be included in the measure and for whom is this an appropriate measure?; What data is collected, analyzed and displayed; Where are the data coming from?; When is the appropriate time to measure this outcome?; and Why is this data important? The preliminary results of initiative will be discussed with participants, who will learn what the next steps for the work are and how they can assist.

### Concurrent Sessions

#### Career Tracks & Professional Development for IR

This session, designed to help attendees define and achieve their career development goals, will have three parts. Part one will be a discussion of some universal skills everyone needs to be an effective professional in Institutional Research. In part two, participants will receive a list of questions for self-examination to help them hone their own career priorities. This is designed to be an individual activity that could also be used in partnership with a mentor or trusted colleague. Part three will be an examination of four potential career paths for people with IR experience. These tracks will include opportunities outside of IR and within IR at the Specialist, Director and AVP/VP levels.

Workshare

3:15 pm - 4:00 pm  
*Washington B*

**Melanie Larson**  
Lasell College

**Rebecca Brodigan**  
Bowdoin College

**Elizabeth Clune-Kneuer**  
St. Mary's College of  
Maryland

**Gayle Fink**  
Bowie State University

#### The Future of Institutional Research - Performance Management

This session will discuss how IR departments can lead institutional efforts at performance management by creating a data driven cultural. With external and internal pressures continuing to build in both the academic and administrative areas for accountability, for transparency and for effectiveness, come learn how you can be instrumental in driving your institution's performance.

*USS New Jersey*

**John Miller**  
Nuventive

**Peter Feigenbaum**  
Fordham University

#### Enrollment Projection: Use of Multiple Predictive Models

Office of Institutional Research and Assessment at Binghamton University has been using different methods to estimate enrollment for continuing students. More specifically, we have been using two particular methods- Average Return Ratio Model and Logistic Regression Model consistently for the last ten years in order to obtain more accurate enrollment projection. The objective of this presentation is to demonstrate and further discuss the accuracy of enrollment projection by each of these methods. Additionally, we seek to understand the variables that influence students to continue from prior semester to the next semester.

Workshare

3:15 pm - 4:00 pm  
*USS Olympia*

**Nasrin Fatima**  
Binghamton University

**Tania Das**  
Binghamton University

#### Institutional Policymaking: An Emerging Role for IR

The presenters will discuss their work as managers of the institutional policymaking process at their respective institutions. Participants will learn what is involved in policy work and why institutional research/planning/effectiveness (IRPE) is well suited for it from three main perspectives: (1) the skill sets that IRPE & policy professionals possess, (2) the type of institutional roles IRPE & policy professionals serve, and (3) level/location of organizational structure IRPE & policy professionals are typically situated in an institution. The workshare will also offer insights on how new career paths may be forged for IRPE professionals through the policy role.

Workshare

4:15 pm - 5:00 pm  
*Columbus A*

**Christopher Hourigan**  
Rhode Island College

**Kathryn Yerkes**  
The University of Scranton

## Monday, November 10, 2014

### Concurrent Sessions

#### Mating Course Schedules to Predicted Enrollment

Institutions are under pressure to offer new courses and programs to attract additional students. Simultaneously, they face demands to reduce the overall cost of education incurred by registrants. As added curricula may require additional faculty, this appears to be a daunting task. However, accurate enrollment predictions empower programs to schedule seats based on predicted need, highlighting potential course section savings and possibilities for cyclical course scheduling. As staffing aligns with instructional demand, additional expenses over revenue generated are minimized. Thus, programs are empowered to create additional curricula while meeting fiscal demands.

Workshare

4:15 pm - 5:00 pm  
*Columbus B*

**Michelle Kiec**  
Kutztown University

#### Maximize Your Efforts by Streamlining External Reporting

Three colleges will share a common process by which data collection and reporting to external bodies was streamlined. A non-profit organization will describe its use of the web and crowdsourcing to facilitate data collection, reporting, and analysis. The session will conclude with an open discussion regarding possible process improvements and the pros and cons of each method. Participants will: a) learn about key aspects to consider when developing and implementing a streamlining method; b) learn about a new initiative being developed by a third-party that may override the need for institutions to create their own method; and c) evaluate both methods, their pros and cons, and determine which solution best fits their institution's needs.

Workshare

4:15 pm - 5:00 pm  
*Columbus C*

**Heather Kelly**  
University of Delaware

#### Predicting 4-Year Student Success From 2-Year Student Data

This presentation will overview 3 years of work tracking student data across institutions, from two community colleges to a four-year online university, to predict and promote community college transfer student success. Funded by a Kresge Foundation grant, the project required working collaboratively to develop a multi-institutional database, formulate research goals, analyze data, and implement and evaluate interventions. We will present key research findings, introduce the Success Calculator, an advising tool predicting students' probability of success prior to transfer, and describe interventions targeting the unique needs of transfer students. Lessons learned in working across institutions to impact student success will be discussed.

Contributed Paper

4:15 pm - 5:00 pm  
*Riverview A*

University of Maryland  
University College

## Monday, November 10, 2014

### Concurrent Sessions

#### Using Multiple Survey Media to Increase Survey Participation

Surveys play an important role in institutional research and are used to collect primary data. A respectable response rate is critical to providing data that can be used for measuring institutional effectiveness, assessing course outcomes, and evaluating programs, etc. The presenter will discuss the use of both web-based and paper surveys to maintain a high response rate (>60%) on a biennial student satisfaction survey without any incentives.

Techshare

4:15 pm - 5:00 pm

*Riverview B*

**Christine Frederick**  
Community College of  
Baltimore County

#### Assessment of College Strategic Plans using Employee Surveys

At the U.S. Military Academy (USMA) at West Point, there is currently an effort to use employee culture surveys to evaluate the effectiveness of strategic plans at USMA. Since 1999, USMA employees have been given a culture survey, either annually or bi-annually, depending upon the organization. This past year, however, survey questions have for the first time been formally linked to strategic plans and objectives at both the organizational and academy level. Our example of survey use may compel other schools' administrators to also use employee surveys to evaluate how well they meet their own strategic plans and objectives.

Workshare

4:15 pm - 5:00 pm

*Riverview C*

**Vincent Lan**  
USMA Office of Institutional  
Research (OIR)

#### Evidence Based-Storytelling: College Portraits At A Glance

The Voluntary System of Accountability Program® ([www.voluntarysystem.org](http://www.voluntarysystem.org)) was created in 2007 as a tool for institutions to demonstrate transparency and accountability in providing consumers and policy makers with unbiased information on the undergraduate learning experience. The core objectives of the VSA remain the same, but as our public conversations have evolved, so has the College Portrait ([www.collegeportrait.org](http://www.collegeportrait.org)). This session will demonstrate the new College Portrait At A Glance tool, which will allow users to create custom snapshots of their College Portrait organized around a central theme or issue.

Workshare

4:15 pm - 5:00 pm

*Washington A*

**Teri Hinds**  
Voluntary System of  
Accountability

#### Data Mining Methods: Applications for Institutional Research

The techshare will explore various data mining techniques and discuss their utility in developing predictive models for admissions decisions and student outcomes. The use of transactions, such as advising visits and interactions with the Blackboard course management system are presented. Some of the data mining methods considered are CART classification and regression trees, along with bagging/boosting, net lift modeling, and the development of regression models when there are correlated predictors. The partitioning of the data into training, validation, and test samples for developing effective models is explained, along with the various diagnostic tests for determining model accuracy. (2014 NEAIR Ambassador Grant Recipient)

Techshare

4:15 pm - 5:00 pm

*Washington B*

**Nora Galambos**  
Stony Brook University

## Monday, November 10, 2014

### Concurrent Sessions

#### Better Insights Through Visual Reporting of IR Data Using SAS®

In this presentation, you will learn how to use SAS® Visual Analytics specifically in areas of enrollment and retention -- whether with your data warehouse or just existing data sources – to quickly design reports that are attractive, interactive and meaningful and then distribute those reports via the web, or through mobile BI on an iPad® or tablet.

NEAIR Member & Sponsor Presentation

4:15 pm - 5:00 pm  
*USS New Jersey*

**Eileen Shea**  
SAS

**Shiva Jaganathan**  
University of Connecticut

#### Is That the Right Number? Data Integrity and Validity in IR

Institutional researchers are often expected to produce definitive summary data to be posted in the public domain for use by external policymakers, accreditors, peers, and other outside constituents. It is imperative that these summaries be correct and consistent, but institutional data may be fraught with pitfalls. Given that raw data are rarely perfectly clean and consistently structured, how can you be assured that a summary number is the right one? We will discuss examples of problems that may arise from missing data, incorrect data entry, definitional issues, multiple records or constituencies, and policy changes and offer diagnostic and analytic solutions.

Workshare

4:15 pm - 5:00 pm  
*USS Olympia*

**Lauren Young**  
University at Buffalo

**Rachel Link**  
University at Buffalo

#### Data with a Twist Reception

Poster Session including announcement of Best Visual Display Award at 6:00 pm.

5:30 pm - 6:15 pm  
*Grand Ballroom & Columbus  
Ballroom Foyers*

#### Monday Evening Dinner Groups

Sign up at Grand Ballroom Foyer; Meet in Lobby

6:30 pm

#### Post Dinner Group Entertainment!

Come back from dinner and head to the hotel bar and lounge (Keating's River Grill) to hear sounds of Dave Baker, a Contemporary, Jazz and Classical Guitarist. Have a drink of choice, relax, and continue the conversations with your colleagues and friends.

Entertainment

8:30 pm - 1:30 am  
*Hotel Bar and Lounge*

## Tuesday, November 11, 2014

<b>Continental Breakfast</b>  NEAIR Conference Team Leaders encourage SIG and Table Topic attendees to eat breakfast first before attending session of choice.	7:30 am - 8:45 am <i>Grand Ballroom</i>

### Special Interest Groups and Table Topics

#### **2013 Best First Paper: An Institutional Model for Degree Completion: A Moneyball Approach**

At the turn of the 21st century, the Oakland Athletics revolutionized the way baseball players were evaluated by moving away from conventional measures to measures that would increase a team's chances of winning. This Moneyball approach was effective as Oakland competed against New York and Boston, even though their payroll was remarkably small compared to the Yankees and Red Sox. This table topic is a follow-up to the paper presented at NEAIR last year and is an opportunity to discuss how our office has utilized this model in developing more effective reports with regards to retention and degree completion studies. We hope this will lead to a discussion about other types of Moneyball statistics in higher education.

Table Topic

8:00 am - 8:45 am  
*Grand Ballroom*

**Alexander Yin**  
The Pennsylvania State  
University

#### **Using SelectSurvey**

SelectSurvey is the survey software program used by the USMA Office of Institutional Research. We use it to survey employees on work satisfaction and other issues; to survey students for course evaluations and for their attitudes regarding honor, toughness, and other issues; and for special requests that come to our office. We would like to learn how we can better and more efficiently (if possible) use this software program, through discussion with others who have also used it.

Table Topic

8:00 am - 8:45 am  
*Grand Ballroom*

**Vincent Lan**  
U.S. Military Academy  
(USMA) at West Point

#### **Challenges in Assessing Online Programs**

Students in undergraduate online programs often differ from traditional students. At my university, undergraduate students in online programs are older than our typical undergraduate population, often attend part-time, and usually have prior college credits. Additionally, the online student may have other responsibilities that distract from coursework and/or make the student more likely to stop-out during the course of his or her studies. Therefore, typical methods of assessing success, such as retention or graduation rates, may not be the best measures of success for online students that are not following a traditional educational path. Ideas will be discussed regarding the best way to assess the success of online students.

Table Topic

8:00 am - 8:45 am  
*Grand Ballroom*

**Jason Diffenderfer**  
Pace University

#### **Three-Year Graduates at a Four-Year Institution: Challenges and Opportunities**

An increasing number of students graduate from high school with a significant number of advanced placement credits or dual-credit courses taken at a community college. Many of these students are therefore able to graduate in three years with a four-year degree. What kinds of challenges and opportunities do these students provide for our colleges and universities? What role can (or should) institutional researchers play in evaluating the effect of these students on enrollment management and institutional performance? How can we most effectively measure the outcomes of these students?

Table Topic

8:00 am - 8:45 am  
*Grand Ballroom*

**Lee Allard**

### Special Interest Groups and Table Topics

<p><b>Alumni Outcomes Survey Says Verses Integrating Additional Data Sources</b></p> <p>Alumni outcomes are important to know. Yet surveys only capture a certain percentage of our graduating classes. What do we know from survey data, and how do we integrate secondary sources into our reporting? The session will introduce our one year out alumni survey process and explorations of different secondary sources; primarily LinkedIn and the Clearinghouse, along with the potential challenges of integrating these data with data collected via survey. Discussion will focus on what can we can do with these sources together in the reporting process, what could be considered best practices from an IR standpoint, and if these pockets of knowledge could help target our survey outreach.</p> <p style="text-align: right;">Table Topic</p>	<p style="text-align: right;">8:00 am - 8:45 am <i>Grand Ballroom</i></p> <p style="text-align: center;"><b>Claire Goverts</b> The College at Brockport - SUNY</p>
<p><b>SNAAP Survey Users</b></p> <p>SNAAP is the Strategic National Arts Alumni Project survey. This Table Topic will provide a chance for institutions that participated in SNAAP to discuss how they have reported their results and how the results have been used at their institutions.</p> <p style="text-align: right;">Table Topic</p>	<p style="text-align: right;">8:00 am - 8:45 am <i>Grand Ballroom</i></p> <p style="text-align: center;"><b>Michael Duggan</b> Emerson College</p> <p style="text-align: center;"><b>Mary Roetzel</b> School of the Museum of Fine Arts, Boston</p>
<p><b>Servant Leadership Through Institutional Effectiveness</b></p> <p>Paul Dressel, an early founder of institutional research, saw the profession as an independent force empowered to objectively look into all aspects of an institution, especially the self-study and long range planning. Inherent in his theory was the evolving concept of servant leadership in organic learning environments that was being developed through the lens of the new quantum view of the sciences. In essence, the servant leader's role is to insure that the highest priority needs of the institution, and the people in it, are met. This table topic will explore servant leadership, its challenges, and its call for resilience in the IR practitioner who is faced with the political resistance generated by organizational change.</p> <p style="text-align: right;">Table Topic</p>	<p style="text-align: right;">8:00 am - 8:45 am <i>Grand Ballroom</i></p> <p style="text-align: center;"><b>Cristi Carson</b> Baton Rouge Community College</p>
<p><b>Penn State's Institutional Research Graduate Certificate Program</b></p> <p>Penn State's online graduate certificate program in IR will be discussed. Table is targeted to individuals interested in the certificate and current students and alumni of the program.</p> <p style="text-align: right;">Table Topic</p>	<p style="text-align: right;">8:00 am - 8:45 am <i>Grand Ballroom</i></p> <p style="text-align: center;"><b>James Trainer</b> Villanova University</p> <p style="text-align: center;"><b>Fred Loomis</b> The Pennsylvania State University</p>

<p><b>We're Number 80?! Placing Rankings in Context for Leadership</b></p> <p>With a change in senior leadership, the Office of Institutional Research &amp; Evaluation (OIRE) at Tufts has seen an increase in interest in university ranking systems, in particular international systems like ARWU, THE, QS, and U-Multirank, but also domestic systems like Washington Monthly and Forbes. Communicating with senior leadership about these rankings' methodology, Tufts' place in the rankings, and the "whys" of Tufts' changes in position, has been an ongoing project. This session will describe the rankings systems that have garnered the most attention at Tufts, the ways in which OIRE has analyzed and communicated with leadership about these rankings, and the surprises that have arisen along the way.</p> <p style="text-align: right;">Workshare</p>	<p>9:00 am - 9:45 am <i>Columbus A</i></p> <p><b>Jessica Sharkness</b> Tufts University</p> <p><b>Dawn Terkla</b> Tufts University</p>

## Tuesday, November 11, 2014

### Concurrent Sessions

#### Preventing Attrition: A Comprehensive Retention Package

Student retention is the cornerstone of any institution's success. As institutions become more and more reliant on tuition funds to support their mission and vision, student success (as defined by continuous enrollment and completion) becomes a central part of the institution's function. As the population of at-risk students (particularly, low-income and first-gen) rise, institutions have to race the realization that significant investment in retention strategies is needed to ensure that successful completion of those students. This program will serve to provide an overview of one such implementation, and outline the successes and shortcomings with the intent on providing a framework for the design of similar programs and other institutions.

Contributed Paper

**Ross Conover**  
St. Mary's College of  
Maryland

#### Reporting and Benchmarking Faculty Productivity

In response to the demands for improved institutional planning and decision-making, the institutional research office at a public research university continues to explore ways for reporting and benchmarking faculty productivity. This presentation will: 1) review historical perspectives on the faculty roles and productivity, 2) review data sources and tools useful for benchmarking faculty productivity, and 3) summarize strategies and projects undertaken thus far by IR in reporting and benchmarking faculty productivity. Participants will learn the scope of faculty productivity, data sources, and strategies to reporting and benchmarking faculty productivity. Participants will be encouraged to share their experiences, ideas and suggestions.

### Concurrent Sessions

#### No Place Like Home? Location in Matriculation Decisions

Respondents to a recent survey of law school applicants indicated that school location was a primary consideration in deciding where to apply. This presentation will examine application and matriculation patterns by geographic location across various subpopulations of the law school applicant population (e.g., race/ethnicity, gender, LGBT status, type of undergraduate institution). Results of this research will provide a more complete picture of which law school applicants are more likely to matriculate at institutions closer to home and which are more likely to matriculate at schools farther from home. The goal of this research is to offer empirical research to inform the admissions recruiting process.

#### e-Assessment: Reporting Using Electronic Surveys Tools

Does your institution need an institution-wide system for reporting assessment of student learning but not want to invest in an assessment management system? This session demonstrates how one large, research institution manages assessment reporting using electronic survey tools. Participants will learn about Temple University's assessment model and how low-cost, user friendly reporting tools were developed and refined based on this assessment model. Sample reporting tools, rubrics for assessing the reports and sample "Assessment Snapshots" will be shared with the audience. Participants will have opportunities to discuss ways in which they can implement similar tools at their institutions.

Workshare

9:00 am - 9:45 am  
*Riverview C*

**Gina Calzaferri**  
Temple University

#### IR's Role in a World of Data Warehouses: A Theoretical Model

The presentation explains why IR should play a central role in developing and maintaining campus-wide reporting solutions developed through data warehousing or other "business intelligence" software. It offers a theoretical model of institutional decision-making, showing how IR fits into this paradigm and demonstrating how data warehouses can both remove constraints hindering IR from providing accurate, reliable and timely information to key decision makers, and simultaneously, strengthen IR's analytic role on campus. It demonstrates how the incorporation of a data warehouse can change the campus's administrative culture, providing further evidence why IR should play a central role in its development.

## Tuesday, November 11, 2014

### Concurrent Sessions

#### Creating Course Evaluation Summaries with Microsoft Excel

This workshop will demonstrate the use of formulas, cell references, and Visual Basic for Applications (VBA) to automate the creation and distribution of course evaluation summaries with Microsoft Excel. Using references and formulas, raw data from Qualtrics or other survey software will be transformed into question averages and individualized graphs, while VBA will save evaluations as PDFs and distribute them as attachments via Microsoft Outlook to instructors. Limitations, workarounds, and other uses for automation will be discussed. Intended outcomes include understanding the use of VBA for automating tasks; troubleshooting broken code and formula errors; and adapting automation to other IR-related projects.

Techshare

#### IR, Assessment and the IRB: The Use and Abuse of IRBs

30+ years after the first regulations for research involving human subjects were published there remains confusion about the meaning of the regulations, particularly when it comes to IR and assessment projects. IRBs are often misunderstood by applicants and even IRB members often err in interpreting the regulations when it comes to educational projects. This session will provide a succinct summary of the key regulatory passages that guide IRBs when considering institutional research and assessment projects. We will look closely at the definitions of research, human subjects, minimal risk and the exemption criteria, as well as considerations of scientific method in an effort to dispel some myths about IRB requirements.

### Concurrent Sessions

#### **The False Promise of Net Price as an Affordability Metric**

Net price represents an institution's cost of attendance less grant aid received by students, and it has been heralded as the best available measure of affordability for colleges and universities. This promise, however, is overstated because the cost of living components that figure into net price calculations are ill-defined and unevenly calculated. This paper examines the variability in cost of attendance determinations to demonstrate that significant and overlooked components of room and board, transportation, and other expenses for commuter students confound net price calculations to make net price a problematic metric to measure affordability or use in accountability systems.

#### **Different Approaches to Using the Updated NSSE Survey**

In 2013, NSSE updated its survey, redesigned institutional reports and offered additional survey modules. During this work share, we will share how our institution is using student engagement results and we will hear how others are using student engagement results in new and innovative ways. Come to share ideas and gather different approaches to working with NSSE data.

#### **The Good Old Days?: Satisfaction at Graduation and Beyond**

Do you look back on your college or graduate years as the "good old days?" If so, have you ever wondered if the alumni responding to your institutional research office's alumni surveys likewise remember the institution only through rose-colored glasses? This presentation shares one IR office's attempt to explore whether such a phenomenon is systematically prevalent at a research-intensive university. That is, do alumni tend to systematically rate their satisfaction higher than they did as seniors or exiting graduate students? This research emerges in response to increasing campus interest in alumni studies and their strengths and limitations, and emphasizes implications for improving the IR community's understanding of alumni research.

### Concurrent Sessions

#### Save Time & Effort: Morph One Predictive Model Into Another

There are many uses for predictive modeling in higher education; enrollment management, retention, academic performance and fund raising are a few examples. It can be very efficient and very productive to leverage the time and effort invested to create a predictive model to build a new one, as opposed to starting from scratch. Typically, there is the need to add or modify the list of input variables and obviously you must change the output variable as well. This is usually a relatively straightforward process. This presentation shows how this has been done at Dickinson College using Rapid Insight® and discusses a few other possible scenarios where this might be a practical approach.

#### Academic Program Review at a Public University

In this presentation, we will run through a detailed and nuanced explanation of how we conduct academic program reviews at the University at Albany. This will include a look at our timeline, data collection, selection of reviewers, preparation of the self-study, the site visit, the reviewers' report, the departmental response, and governance oversight. We will discuss recent changes made to our "Practitioner's Guide" to improve the process as a whole.

#### Starting a Campus Compliance Program Within a Small IR Shop

Colleges and universities consistently struggle today to meet the every changing demands of the higher education regulatory environment. This workshare will show how a small private college IR Office identified the need, designed, and implemented a campus compliance program. Participants will learn what worked for one college's small IR staff and what might work for other institutions.

#### Community College Transfer Students' Persistence at University

While the performance of community college transfer students at four-year universities has been well examined, less is understood about learners' persistence at their transfer institutions. We will introduce two models predicting community college transfer students' re-enrollment (enrollment in semester following the first semester of transfer) and retention (enrollment during the 12-months following the first semester of transfer) at a four-year, online university. Demographic characteristics, community college background factors, and first-semester GPA at the transfer institution were found to be predictive of re-enrollment and retention. Implications for supporting students' continued enrollment and persistence will be discussed.

#### Report Automation and Data Consistency in IR

Temple University's Office of Institutional Research and Assessment (IRA) dedicates a large proportion of time generating reports for various internal and external constituents. Over the past year, Temple has dedicated resources into establishing a method of report automation. The objective of this endeavor has been to minimize staff resources allocated to report generation, to lessen data transcription errors, and to ensure consistency in reporting. In addition, the process of identifying data sources has uniquely positioned IRA in assisting the university with data integrity. This work share will highlight our challenges, outcomes, and allow for a discussion of the role of IR in university reporting and data integrity.

#### Advanced Analytics Driven Research for Retention and Success

President Obama made science and engineering study a national priority to maintain American global leadership. This research addresses the issue of higher attrition rate among engineering students in a major private research institution. This is a multi-cohort retention and success study. Multivariate methods including proportional hazard model and regression analysis were performed controlling for covariates such as admission and FA criteria. Both analytics approaches yield consistent findings that a set of predictive factors jointly maximize students' chance of success and persistence in Engineering. These findings provide guidance for the institution in making admission policies for shaping an academically prepared and persistent class of engineering students.

### Concurrent Sessions

#### Text Mining Applications for the Institutional Researcher

Institutional researchers have a wealth of unstructured data at their disposal: open-ended survey responses, social media, and other documents. In this workshare, we will demonstrate several methodologies for analysis of text using social media (Twitter) posts we recently analyzed for our university's communications office. We will demonstrate use of sentiment analysis as well as using a document-term matrix (DTM) to do additional analyses (term frequencies, word associations, cluster and principal components analysis). We will discuss the assumptions, limitations, and potential pitfalls of each technique.

#### Going Test-Optional and Beyond: Gathering Evidence and Making the Decision at Ithaca College

This study is an expansion of the 2013 NEAIR Best IR/ Practitioner Award winning research, which helped Ithaca College's administration decide whether or not to adopt a "test-optional" admission policy. The study examined the incremental validity of standardized test scores in predicting students' academic success in college. Attendees will learn details about the development of the study methodology, data gathering, statistical modeling, analysis, and decision-making process that led Ithaca College to implement a test-optional policy beginning with the entering class of fall 2013. The present study adds an analysis of early retention and academic performance outcomes of the first test-optional cohort.

#### Developing an Instructional Activity Report

In converting from a quarter to semester calendar, RIT's Provost requested a report that would help track changes in teaching patterns across the transition. The report needed to be concise (no more than two pages) and include several specified measures in which his office had particular interest. In addition, the report needed to cover a four-year rolling time window and it needed to be updated within weeks of each census date. Complicating this request was the recent transition from a legacy data system to PeopleSoft's Campus Solutions student information system. This presentation will provide information on the technical, political, and practical processes of developing a high-visibility report for a college administration's use.

#### Final Course Grades: Comparing Full- and Part-Time Faculty

The percentage of full-time faculty in higher education is declining, and an increasingly greater proportion of students are being taught by part-time instructors. Is there a difference between these two groups of instructors in student final course grades? We compare the average classroom final course grades of students taught by full and part-time instructors to see if there are differences in final grades between the two groups of instructors. Knowing the relative effectiveness of different instructor categories could help in promoting better student outcomes and resource allocation.

#### Integrative Learning: Helping Students Make the Connections

At the University of Michigan, research conducted with student leaders showed that even though most of these leaders reported having “extraordinary” learning experiences, the vast majority of them could not describe what they had learned, why or how it was valuable to them, or how they might apply their knowledge and skills. Through integrative learning, students can make meaningful connections of their experiences, synthesize their learning, and gain a greater understanding of how their skills and knowledge can help them achieve their academic, professional, and personal goals. This research demonstrates how an ePortfolio-based educational process can lead to significant gains in integrative learning.

#### Student Survey Data Management: A Data Warehouse Approach

Managing student survey data is a perennial challenge for IR offices. Aligning trend files for repeated surveys, keeping track of changing items, and merging survey data across different instruments and data sources are time-consuming and error-prone tasks. In certain contexts (large amounts of survey data, large number of staff working with it) a relational database, data warehousing approach may be justified. This session will review (1) the problems with survey data that a warehousing approach is designed to solve, (2) the data model for the warehouse, (3) importing data to and from the data warehouse, and, (4) how the warehouse can facilitate routine reporting and raw data file distribution to other users.

#### Who Completes Online Student Evaluations of Teaching?

With the widespread move to the online administration of student evaluations of teaching (SETs), much discussion has taken place regarding methods for increasing completion rates. Most of this conversation has focused on general methods of publicity and/or ways of motivating students to complete the forms. The goal of this research is to lay the groundwork for a new approach to encouraging student participation by identifying the individual, course, and departmental factors that affect the likelihood of SET completion. This analysis uses data from an institution in which course evaluation forms differ across, and sometimes within, departments, which allows for a multilevel analysis of SET completion.

#### So Bennington: An Informal Proxy for Student Success

Students, faculty, and staff at Bennington College often praise something on campus – a person, an event, an activity– as being “so Bennington.” In this workshare, I will describe how members of the admissions office and dean’s office at Bennington College are collaborating to define the meaning of “so Bennington” as an informal proxy for student success. Through this effort, we hope to fine-tune our existing criteria for admissions, enrich our ongoing retention efforts on the academic side, and generally calibrate our understanding of what it means for a student to succeed at Bennington.

Bilander is more than just dashboards. Think of us as “dashboards plus”. Our business intelligence solution delivers all the functionality you’ll find in leading BI solutions. However, we’ve co-designed our solution with higher education professionals to include extended functionality that helps address the specific needs of IR departments. Our solution uses advanced monitoring, alerting and automation to help you explore the trends and causes behind leading issues like falling enrollment, retention and graduation rates. We also deliver robust watchdog capabilities that give you early warning of critical student patterns to help take action to prevent problems before they impact your program. Our automation capabilities help eliminate tedious, repetitive work like recurring compliance report generation (we’ve reduced reporting times by as much as 95% for our customers). Our higher education solution is designed to consolidate your organizational data into a single snapshot of performance and let you and your team capitalize on opportunities and avoid pending problems. Talk to us about how our competitively-priced student-centric lifecycle BI model can help you target enrollment issues this semester!

SAS' roots were established over 35 years ago when it was founded at North Carolina State University. Today, more than 3,000 educational institutions use SAS® to obtain accurate, critical and timely information. With SAS, users can aggregate and analyze data to improve decision making and strategic planning.

SAS helps institutions:

- Analyze data on students, faculty, programs, facilities, etc.
- Provide self-service reporting to all users.
- Proactively manage enrollment, retention and programs.
- Target potential students and ensure the success of those currently enrolled.

Since 1976, SAS has given educators The Power to Know®.
